I excel at finding practical solutions to real-world problems, always prioritizing user needs to deliver a meaningful experience; I highly value teamwork and fostering ongoing collaboration to achieve greater results, and I am committed to writing clean, organized, and easy-to-maintain code, viewing hands-on experience and learning from mistakes as essential to professional growth and continuous improvement.

PROFESSIONAL EXPERIENCE

Softtek

Backend Developer

Cartago, Colombia

April 2025 – February 2026

- I provided support for a production system based on legacy code, ensuring its stable operation.
- I developed user documentation aimed at non-technical users, making the system easier to understand.
- I analyzed functional requirements to define the solution's structure.
- I collaborated with multidisciplinary teams using the Waterfall methodology.

Colombiana Accesorios

Backend Developer

Cartago, Colombia

February 2024 – February 2025

- I migrated and modernized key modules of an ERP system built on .NET, including quoting, product catalog, and inventory.
- I developed a quoting module capable of generating invoices and assigning products to customers, improving the business workflow.
- I reduced inventory discrepancies by **10%** through real-time validations and refactoring of critical logic.
- I optimized SQL queries in **MySQL**, achieving a **35%** reduction in response times through normalization and indexes.
- I documented technical workflows for new developers, accelerating the team's learning curve.
